( chime 7 of 8 )

artist:

Mark Beasley

location:

San Pedro, CA

about:

This wind chime is a web browser extension that sonifies the network traffic flowing through the air between your wifi router and your computer.

The larger the traffic, such as images or video, the deeper the chime. It is available for [Chrome](#) and [Firefox](#).

( chime 8 of 8 )

artist:

Lola Orge Benech

location:

Buenos Aires, Argentina

about:

"I built my wind chime from my valuable objects. The base is made of ancient

iron, found on the coast of Rio de la Plata. The pendants are amulets in themselves: a key to an important place that I keep but cannot use, some shells from Mar del Plata, where I immersed myself in the sea for the first time a few months ago, among others. Given gifts and found charms, they collide with each other and their sound mixes with the hardness of the shells. But they do not touch too often, sometimes it is difficult for the wind to find the city, for it to fly freely. It is difficult for the air to arrive in its pure state. On his journey he crashes and scatters in a thousand directions, he loses his way. It fragments. You hear the city as well, and you never get used to it. Where I am from the wind finds its true voice, it is respected. But now, here where I am: I was able to find a little piece of heaven for my wind chime of luck. I ask the floating shells to be heard in their subtlety of sound. And that in its silent song the sea as immensity, brings in the wind as total."
